

SOIL BLOCK MIX RECIPES

2⁰⁰ MINI or 4⁰⁰ MAXI BLOCKS

Gather the following tools prior to your project:

- Large bushel-sized wheelbarrow or other container for mixing
- 1 "bucket" which measures 10-quarts and 5-quarts (half bucket)
- trowel or other mixing implement; (or hands, with or without gloves)
- sifting screen made with ¼" hardware cloth or minnow trap

INGREDIENTS

Note: all ingredients should be screened to 1/4" before measuring and adding to the mix.

- 1 ½ buckets peat OR half peat/half coco peat
- 1 bucket compost, thoroughly decomposed
- 2 1/4 cups Base Fertilizer (see below)
- 1 bucket perlite
- ½ bucket good garden soil (or more compost)

BASE FERTILIZER: Mix all ingredients together well.

- ½ cup blood meal, feather meal, cottonseed meal, shrimp or crab meal, or alfalfa meal
- ½ cup colloidal phosphate (soft rock phosphate)
- ½ cup greensand
- ½ cup glacial rock dust or mined rock dust
- ¼ cup agricultural lime (powdered)

INSTRUCTIONS

Mix together the Base Fertilizer and set aside

Mix together the peat and compost

Add the Base Fertilizer and mix well

Add the perlite and mix well

Add the good garden soil and mix well
